

# Mapping Tables

This document serves as the schema reference for the Covid Data for Shared Learning (CDLS) log extraction process. It details the mapping logic used to transform raw dataset columns into standardized event log activities and their respective attributes.

## Activity: ER Admission

| Event Attribute        | Table                 | Column                                                     |
|------------------------|-----------------------|------------------------------------------------------------|
| timestamp              | <i>patient_01.csv</i> | admission_date_emerg (Date)<br>time_admission_emerg (Time) |
| er_admission_diagnosis | <i>patient_01.csv</i> | diag_emerg                                                 |
| department             | <i>patient_01.csv</i> | department_emerg                                           |

## Activity: ER Triage

| Event Attribute | Table                 | Column                                                          |
|-----------------|-----------------------|-----------------------------------------------------------------|
| timestamp       | <i>patient_01.csv</i> | admission_date_emerg (Date)<br>time_constant_first_emerg (Time) |
| blood_press_max | <i>patient_01.csv</i> | bp_max_first_emerg                                              |
| blood_press_min | <i>patient_01.csv</i> | bp_min_first_emerg                                              |
| temp            | <i>patient_01.csv</i> | temp_first_emerg                                                |
| heart_rate      | <i>patient_01.csv</i> | hr_first_emerg                                                  |
| O2_saturation   | <i>patient_01.csv</i> | sat_02_first_emerg                                              |
| glucose         | <i>patient_01.csv</i> | glu_first_emerg                                                 |

## Activity: ER Last Visit

| Event Attribute | Table                 | Column                                                      |
|-----------------|-----------------------|-------------------------------------------------------------|
| timestamp       | <i>patient_01.csv</i> | admission_d_inpat (Date)<br>time_constant_last_emerg (Time) |
| blood_press_max | <i>patient_01.csv</i> | bp_max_last_emerg                                           |
| blood_press_min | <i>patient_01.csv</i> | bp_min_last_emerg                                           |
| temp            | <i>patient_01.csv</i> | temp_last_emerg                                             |
| heart_rate      | <i>patient_01.csv</i> | hr_last_emerg                                               |
| O2_saturation   | <i>patient_01.csv</i> | sat_o2_last_emerg                                           |
| glucose         | <i>patient_01.csv</i> | glu_last_emerg                                              |

## Activity: ER Discharge

| Event Attribute     | Table                      | Column                                                      |
|---------------------|----------------------------|-------------------------------------------------------------|
| timestamp           | <i>patient_01.csv</i>      | admission_d_inpat (Date)<br>time_constant_last_emerg (Time) |
| er_destination      | <i>patient_01.csv</i>      | destin_emerg                                                |
| principal_diagnosis | <i>diagnosis_er_02.csv</i> | dia_ppal                                                    |
| diagnosis_*         | <i>diagnosis_er_02.csv</i> | dia_*                                                       |
| procedure_*         | <i>diagnosis_er_02.csv</i> | proc_*                                                      |

**Note:** attribute with \* are repeated with a different index.

## Activity: Hospital Admission

| Event Attribute          | Table                 | Column                                                      |
|--------------------------|-----------------------|-------------------------------------------------------------|
| timestamp                | <i>patient_01.csv</i> | admission_d_inpat (Date)<br>time_constant_last_emerg (Time) |
| hosp_admission_diagnosis | <i>patient_01.csv</i> | diag_inpat                                                  |

## Activity: ICU Stay

| Event Attribute | Table                 | Column      |
|-----------------|-----------------------|-------------|
| timestamp       | <i>patient_01.csv</i> | icu_date_in |

## Activity: ICU Discharge

| Event Attribute | Table                 | Column       |
|-----------------|-----------------------|--------------|
| timestamp       | <i>patient_01.csv</i> | icu_date_out |

## Activity: Check Vitals

| Event Attribute | Table                     | Column                                                 |
|-----------------|---------------------------|--------------------------------------------------------|
| timestamp       | <i>vital_signs_04.csv</i> | constants_ing_date (Date)<br>constants_ing_time (Time) |
| blood_press_max | <i>vital_signs_04.csv</i> | bp_max_ing                                             |
| blood_press_min | <i>vital_signs_04.csv</i> | bp_min_ing                                             |
| temp            | <i>vital_signs_04.csv</i> | temp_ing                                               |
| heart_rate      | <i>vital_signs_04.csv</i> | hr_ing                                                 |
| O2_saturation   | <i>vital_signs_04.csv</i> | sat_o2_ing                                             |
| glucose         | <i>vital_signs_04.csv</i> | glu_ing                                                |

## Activity: Medication

| Event Attribute | Table                    | Column                 |
|-----------------|--------------------------|------------------------|
| timestamp       | <i>medication_05.csv</i> | drug_start_date (Date) |
| daily_dose_*    | <i>medication_05.csv</i> | daily_avrg_dose        |
| drug_name_*     | <i>medication_05.csv</i> | drug_comercial_name    |
| id_atc5_*       | <i>medication_05.csv</i> | id_atc5                |
| id_atc7_*       | <i>medication_05.csv</i> | id_atc7                |
| drug_end_*      | <i>medication_05.csv</i> | drug_end_date          |

**Note:** attribute with \* are repeated with a different index.

## Activity: Lab Test

| Event Attribute    | Table             | Column                             |
|--------------------|-------------------|------------------------------------|
| timestamp          | <i>lab_06.csv</i> | lab_date (Date)<br>time_lab (Time) |
| lab_number         | <i>lab_06.csv</i> | lab_number                         |
| item_*             | <i>lab_06.csv</i> | item_lab                           |
| res_value_*        | <i>lab_06.csv</i> | val_result                         |
| res_text_*         | <i>lab_06.csv</i> | result_text                        |
| measurement_unit_* | <i>lab_06.csv</i> | ud_result                          |
| ref_values_*       | <i>lab_06.csv</i> | ref_values                         |

**Note:** attribute with \* are repeated with a different index.

## Activity: Hospital Discharge

| Event Attribute         | Table                        | Column                |
|-------------------------|------------------------------|-----------------------|
| timestamp               | <i>patient_01.csv</i>        | discharge_date (Date) |
| hosp_destination        | <i>patient_01.csv</i>        | destin_discharge      |
| principal_diagnosis     | <i>diagnosis_hosp_03.csv</i> | dia_ppal              |
| principal_diagnosis_poa | <i>diagnosis_hosp_03.csv</i> | poad_ppal             |
| diagnosis_*             | <i>diagnosis_hosp_03.csv</i> | dia_*                 |
| diagnosis_poa_*         | <i>diagnosis_hosp_03.csv</i> | poad_*                |
| procedure_*             | <i>diagnosis_hosp_03.csv</i> | proc_*                |

**Note:** attribute with \* are repeated with a different index.
